This month’s featured premium: “Blood and Oil: The Dangers and Consequences of America’s Dependence on Foreign Petroleum” Video DVD

Michael Klare, one of the world’s most renowned experts on energy and security issues, unearths declassified documents and highlights forgotten passages in prominent presidential doctrines to show how concerns about oil have been at the core of American foreign policy for more than 60 years - rendering our contemporary energy and military policies virtually indistinguishable.

“Blood and Oil” calls for a radical re-thinking of U.S. energy policy, warning that unless we change direction, we stand to be drawn into one oil war after another as the global hunt for diminishing world petroleum supplies accelerates.
